E-Mail: afrinashar1@gmail.com Portfolio: https://afrin-ashar.vercel.app/

## Profile Summary

Full Stack Engineer with 4 years of experience delivering enterprise-grade web applications across frontend (React.js, Next.js, TypeScript) and backend (Node.js, Express.js, REST APIs, WebSocket). Skilled in database design and optimization (MongoDB, PostgreSQL, Redis), micro-frontend architecture, and cloud-native deployments using Docker and Kubernetes. Built scalable systems that improved frontend performance by 30% and automated CI/CD pipelines, accelerating release cycles. Hands-on expertise in integrating AI workflows (LLM APIs, RAG, semantic search) into production systems, combining strong system design with modern frontend/backend engineering.

## Primary Skills

**Frontend Development**
- React.js, Angular, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS
- State Management: Redux Toolkit, Redux-Saga, TanStack Query
- Responsive UI Development, Micro-Frontend Architecture (Single-SPA), Component-Based Architecture
- Google Web Designer (GWD)

**Backend Development**
- MERN Stack (MongoDB, Express.js, React, Node.js)
- Node.js, Express.js, Python (Flask/FastAPI), REST APIs, WebSocket, Socket.IO
- Authentication & Security: JWT, OAuth 2.0, Role-Based Access Control

**Databases & Caching**
- MongoDB, PostgreSQL, Redis
- Data Modeling, Query Optimization, Real-Time Data Synchronization

**DevOps & Cloud**
- Docker, Kubernetes, Git, GitLab, Bamboo, Perforce, Swarm Review, CI/CD Pipelines
- ACSC, SDS, DHCP configuration and enterprise networking support
- Cloud-Native Deployments, Release Automation, Performance Optimization, Agile

**AI / GenAI Development**
- LLM APIs (OpenAI, Google Gemini, Hugging Face)
- Retrieval-Augmented Generation (RAG), Semantic Search, Prompt Engineering
- AI Workflow Automation (LangChain, CrewAI, Ollama, ChromaDB, FAISS)
- AI-powered release automation, intelligent agent workflows, AI Reverse Engineering

**Testing & Quality Assurance**
- Jest, UI Automation Testing, Unit & Integration Testing
- Regression Testing Frameworks, Continuous Quality Validation

## Experience

### Software Engineer/Ice Apple technology solutions, Chennai, TN, India
Feb 2025 – Jun 2026

Working for a **USA**-based client, **Light and Wonder (LNW)**.
- Engineered high-performance React.js, Angular, Next.js and TypeScript gaming interfaces supporting 24/7 casino operations, improving responsiveness and maintainability.
- Designed and deployed real-time dashboards and configuration portals with Node.js, Express.js, Python APIs, FastAPI and

WebSocket, enabling faster monitoring and operational decision-making, AI Reverse Engineering.

- Delivered 15+ production-ready features across Agile sprints with zero critical regressions, ensuring reliability in mission-critical environments.
- Optimized React and Angular applications, achieving a 30% boost in performance via reusable components, lazy loading, and rendering improvements.
- Architected an AI-powered release automation platform integrating LLMs, RAG, semantic search, and CI/CD pipelines, reducing manual release effort by 60%.
- Collaborated on database optimization (PostgreSQL, Redis) to support real-time gaming data and reduce latency across distributed systems.
- Implemented secure authentication workflows (JWT, OAuth 2.0) across full stack applications, strengthening system reliability and compliance.
- Managed Perforce version control and Swarm code reviews, ensuring high-quality releases and streamlined collaboration across distributed teams.
- Automated Game Development Workflow (GWD) with Google Web Designer, integrating CI/CD pipelines with Perforce Swarm to accelerate release cycles and reduce manual intervention.
- Configured and maintained ACSC, SDS, and DHCP services to support enterprise networking and secure system deployments.

### Full stack Developer/SSINTEK, Tiruchirappalli, TN, India

Sep 2023 – Dec 2024

Working for **Australia-**based client **TELSTRA**.

- Built scalable React.js, Angular,Next.js and TypeScript applications supporting millions of users, improving reliability and user experience.
- Architected a Single-SPA Micro-Frontend solution that improved platform scalability by 30% and enabled independent deployments.
- Developed a semantic search engine using LangChain, Hugging Face embeddings, and ChromaDB/FAISS, enabling natural language queries across enterprise documents and improving retrieval speed by 40%.
- Reduced production defects by 25% by introducing Jest unit testing across critical components.
- Optimized Bamboo and GitLab CI/CD pipelines, cutting release cycle time by 40% and improving deployment reliability.
- Delivered a full-stack Invoice Management System using React, Angular, Node.js, Express.js, MongoDB, Redis, and WebSocket, supporting real-time updates and containerized scaling with Docker/Kubernetes.

### Full stack Developer/Mequals Technologies, Coimbatore, TN, India

Mar 2022 - Mar 2023

- Developed an enterprise-grade Event Management and CRM platform for five clients using React.js, Node.js, and MongoDB, streamlining customer management and event operations.
- Created a reusable UI automation framework with HTML5, CSS3, Tailwind CSS, Redux, and Redux-Saga, reducing regression testing effort by 50%.
- Enhanced responsiveness by 35% through asynchronous processing and advanced caching, increasing user satisfaction by 20%.
- Maintained data integrity with validation and synchronization mechanisms, reducing discrepancies by 40%.
- Automated Git-based CI/CD deployments and integrated JWT + OAuth 2.0 authentication, strengthening application security and deployment efficiency.

## Education

**BE / Anna University, Chennai, TN, India** Major in Electronics and Communication Sep 2015 – May 2019
