Profile Summary

Software Engineer with 3+ years of experience developing scalable web applications, full stack development, enterprise platforms, and real-time systems using React.js, Next.js, TypeScript, Node.js, and Express.js. Proven expertise in Micro-Frontend architecture, CI/CD automation, cloud-native deployments, and secure authentication using JWT and OAuth 2.0. Experienced in MERN stack, building AI-powered applications leveraging LLMs, OpenAI APIs, RAG, Semantic Search, and Prompt Engineering to automate engineering workflows and enhance product intelligence. Experienced in delivering scalable enterprise applications and AI-driven automation solutions using modern web technologies and cloud-native practices.

Primary Skills

Languages & Frameworks
React.js • TypeScript • JavaScript (ES6+) • Node.js • Express.js • HTML5 • CSS3 • Tailwind CSS
State Management & Databases
Redux Toolkit • TanStack Query (React Query) • WebSocket • Socket.IO • Redis • MongoDB • PostgreSQL
Architecture & Design
Micro-Frontend (Single SPA) • Component-Based Architecture • RESTful APIs • System Design • Performance Optimization • Responsive UI Development
AI & Emerging Technologies
LLM Integration • OpenAI API • Prompt Engineering • Retrieval-Augmented Generation (RAG) • Semantic Search • AI Workflow Automation
DevOps & Cloud
Git • GitLab • Perforce • Perforce Swarm • Docker • Bamboo • CI/CD Pipelines
Testing & Security
Jest • JWT Authentication • OAuth 2.0 • Authentication & Authorization • UI Automation Testing

Experience

Software Developer/Ice apple, Chennai, TN, India

Feb 2025 – present

Working for a **USA-**based client, **Light and Wonder (LNW)**.

- **Engineered** high-performance React.js and TypeScript gaming interfaces supporting 24/7 casino operations, enhancing application responsiveness and maintainability.
- **Delivered** real-time dashboards and configuration portals for Electronic Gaming Machines (EGMs), minimizing manual monitoring and enabling faster operational decision-making.
- **Shipped** 15+ production-ready features across Agile sprints, consistently meeting delivery timelines with zero critical production regressions.
- **Boosted** frontend performance by **30%** through component reuse, lazy loading, code splitting, and rendering optimizations.
- **Architected** an AI-powered release automation platform integrating LLMs, OpenAI APIs, RAG, Semantic Search, Prompt Engineering, Perforce Swarm, and CI/CD pipelines, automating release validation and cutting manual release effort by **60%**.

Software Developer/SSINTEK, Tiruchirappalli, TN, India

Sept 2023 – Dec 2024

Working for **Australia-**based client **TELSTRA**.

- **Built** scalable React.js applications supporting millions of users, enhancing application reliability and user experience.
- **Architected** a Single-SPA micro-frontend solution that increased platform scalability by **30%** and enabled independent deployments.
- **Increased** user engagement by **15%** through frontend performance tuning and TanStack Query optimizations.
- **Lowered** production defects by **25%** by introducing comprehensive Jest unit testing.
- **Optimized** Bamboo and GitLab CI/CD pipelines, shortening release cycles by **40%** while improving deployment reliability.
- **Established a React UI framework leveraging REST APIs, reducing manual regression testing by 50% and accelerating QA cycles.**

Delivered a full-stack Invoice Management System using React, Node.js, Express.js, MongoDB, Redis, WebSocket and Socket.IO, enabling real-time updates and scalable Docker/Kubernetes deployments.

Software Developer/Mequals Technologies, Coimbatore, TN, India

Mar 2022 - Mar 2023

- **Designed** an enterprise-grade Event Management and CRM platform for five enterprise clients using JavaScript and PostgreSQL, streamlining customer management and event operations.
- **Created** a reusable UI automation framework with HTML5, CSS3, Tailwind CSS, and Redux, reducing regression testing effort by **50%** and accelerating release validation.
- **Elevated** application responsiveness by **35%** through asynchronous processing and caching strategies, increasing user satisfaction by **20%**.
- **Maintained** data integrity using validation and synchronization mechanisms, reducing data discrepancies by **40%**.
- **Automated** Git-based CI/CD deployments and integrated JWT and OAuth 2.0 authentication to strengthen application security and deployment efficiency.

Education

BE / Anna University, Chennai, TN, India Major in Electronics and Communication

Secondary Skills

• Python • Next.js • CrewAI • LangChain • Ollama • OpenAI API • Google Gemini API • Hugging Face • ChromaDB • FAISS • GitHub Actions • Kubernetes • Linux • Bash Scripting • Vite • Webpack • Postman
